

Vansh Goyal

Machine Learning Engineer & Software Developer

Indore, India | +91 9993523379 | vanshgoyal1021@gmail.com

[LinkedIn](#) | [GitHub](#)

SUMMARY

AI & Machine Learning undergraduate with strong expertise in predictive modeling, full-stack software development, and data analytics. Experienced in building machine learning models, deploying live enterprise platforms (CRMs, ATS), and developing actionable dashboards for data-driven decision making.

TECHNICAL SKILLS

Programming: Python, SQL, C++, React Native

Data Analytics: Pandas, NumPy, Power BI, EDA, Data Cleaning

Machine Learning: Scikit-learn, TensorFlow, Predictive Modeling, Deep Learning

Tools & Frameworks: Git, GitHub, Scapy, Gemini API, Full-Stack Web Development

EXPERIENCE

Software Developer Intern | *Sanna Innovations*

Jun 2026 – Aug 2026

- Developed and deployed live enterprise web platforms including [Astra CRM](#) and [AstraFlow](#) workflows.
- Engineered an Applicant Tracking System (ATS) for Whitehorse Manpower (ats.whitehorsemanpower.in) to optimize recruitment operations.
- Built and maintained full-stack corporate websites including [The Astra AI](#) and [Sanna Innovations](#), ensuring responsive design and high performance.

Software Developer Intern | *Lintcloud Technologies*

Jan 2026 – Mar 2026

- Contributed to backend development for scalable, data-driven applications.
- Optimized system workflows, significantly improving overall system performance and reliability.

AI & ML Intern | *InLighnX Global Pvt. Ltd.*

Jul 2025 – Aug 2025

- Built a robust fraud detection machine learning model achieving an AUC of 0.97.
- Performed extensive exploratory data analysis (EDA) and feature engineering using Python and Pandas.

PROJECTS

Enterprise CRM & Applicant Tracking Systems

Live Deployments

- Designed and launched scalable cloud platforms including [AstraFlow](#) and [Astra CRM](#) for automated client relationship management.
- Developed a comprehensive Applicant Tracking System ([ATS](#)) tailored for HR operations with live integrations.
- Engineered and deployed official corporate platforms for [The Astra AI](#) and [Sanna Innovations](#).

AI Power Grid Forecasting & Dashboard

TensorFlow, Power BI

- Built an ML model using TensorFlow to accurately forecast regional electricity demand.
- Processed large-scale datasets with Pandas and visualized grid demand patterns using custom Power BI dashboards.
- Secured 3rd Place at the Horizon 8 Hackathon for the solution.

Network Traffic Analyzer

Python, Scapy, Pandas

- Developed a tool for real-time network packet monitoring and capture using Python and Scapy.
- Built automated diagnostic pipelines for analyzing captured network traffic and error diagnostics.

EDUCATION

Joy University

2023 – 2027

B.Tech in Computer Science (Artificial Intelligence & Machine Learning) | CGPA: 9.45

Macro Vision Academy

MPC | 85%

ACHIEVEMENTS

- **Winner:** Horizon 8 Hackathon
- **Leadership:** Chairperson, JU ACM Student Chapter
- **Certification:** Cyber Security Certification, IIT Guwahati
